REACT.JS

PHP

👤 Profile

Frontend and backend developer with a love for developing eye-pleasing, interactive web sites and web applications. Leveraging my frontend & backend development skills seeking an environment that will present the fast pace challenge.

💼 Work Experience

Zerosec India, Junagadh
Frontend Developer

Nov-2021 To May-2023

- Developed and implemented responsive user interfaces, enhancing user experience across various devices and platforms
- Collaborated closely with design and backend teams to translate design concepts into fully functional web applications using HTML, CSS, and JavaScript.

Heptagon Global Services, Gandhinagar
FullStack Developer

Jun-2023 To Oct-2024

- Designed and developed full-stack web applications using HTML, CSS, JavaScript, React.js, PHP, and MySQL.
- Collaborated with cross-functional teams to manage multiple client projects, ensuring timely delivery and responsiveness.
- Participated in code reviews, troubleshooting, and performance optimization.

Ganesh Infotech, Nadiad
Fullstack Developer

Nov-2024 To Present

- Developing and maintaining scalable web applications using technologies such as React.js and SQL databases.
- Leading frontend and backend development tasks, contributing to UI/UX improvements and system architecture.
- Collaborating with the development team to deliver high-quality software solutions and meet project deadlines.

📖 Projects

1. Steller space Reality

Link: https://stellarspacerealty.com/

Role: Frontend Developer

Tech Stack: React.js

Project Summary: Built a responsive real estate portal enabling users to search properties by city and type. Integrated Razorpay for secure payments and developed a PHP-based admin panel for managing listings and bookings.

2. Bharat Organics (NCOL)

Link: https://bharatorganics.ncol.coop/index

Role: Frontend Developer

Tech Stack: Html, Css, Bootstrap

Project Summary: Developed an e-commerce platform for certified organic products under NCOL. Implemented a clean, responsive UI with QR-based product traceability, test report viewing, and product detail pages.

3. Amul Warehouse Management System

Link: https://wms.amul.in/

Role: Frontend Developer

Tech Stack: React.js

Project Summary: Developed and maintained Amul's Warehouse Management System (WMS) portal, designed to streamline inventory control, warehouse operations, and order management across multiple distribution centers. The platform facilitates real-time tracking of goods, automated stock updates, and efficient logistics coordination. Role involved ensuring system scalability, improving user interface responsiveness, and integrating secure authentication protocols to manage role-based access for warehouse staff and administrators.

4. Amul Catalog

Link: https://catalog.amul.in/

Role: Frontend Developer

Tech Stack: React.js

Project Summary: Contributed to the development of Amul's E-commerce Catalog Portal, built to manage and display Amul's extensive range of dairy and consumer products online. The platform enables real-time product browsing, availability tracking, and user-friendly interaction for buyers and internal stakeholders. Focused on building a responsive UI, optimizing product listing performance, and ensuring seamless integration with inventory and order management systems to support scalable e-commerce operations.

5. Ambika Salt

Link: http://103.177.225.221/ambicasalt/index

Tech Stack: React.js

Project Summary: Designed and developed the Ambica Salt web portal to represent the brand's identity and showcase its range of salt products. The website provides comprehensive information about the company, its manufacturing standards, product details, and contact options. Focused on building a clean, responsive, and user-friendly interface to ensure optimal browsing experience across all devices. Contributed to improving brand presence through an informative and performance-optimized website.

6. NCEL Trading Platform

Link: https://trade.ncel.coop/

Tech Stack: React.js

Project Summary: Designed and developed the NCEL Trade Portal to empower India's cooperative sector in global trade. The platform showcases export-ready products from various cooperatives, supports digital transactions, and simplifies export procedures. Focused on building a responsive, secure, and user-centric interface that enhances product visibility and streamlines buyer-seller interactions. The project aimed to strengthen cooperative-driven exports and improve national trade efficiency through a centralized digital system.

7. Chat And Chill(Self Project)

Link: https://chat-and-chill.netlify.app/

Tech Stack: React.js

Project Summary: Created a real-time chat application with an intuitive interface and secure message transmission. Designed for scalability and responsiveness across devices, deployed via Netlify.
